EDUCATION WEEK. WHAT KILLS BOLSHEVISM? A BIGGER DINOSAUR. **FTALIAN IMMIGRATION.**

President Coolidge's message, announcing Education Week, was as brief and as sound as any message on education since Jaures's message to the school teachers of France:

"Teach the children to read in-telligently and all knowledge is open to them."

Fathers and mothers need not worry because their children lack "college education" if they have been taught to read intelligently, and if they read the right books, because their minds crave informa-

A better, more useful education can be got from two years' sys-tematic reading of the right kind than the education planted in the average young student in his four years at college.

Lord Ashfield, Englishman who thinks, says that Bolshevism is kept cown in America by the fact that almost everybody has an au-tomobile. Almost everybody hasn't an automobile. But almost everybody can reasonably hope to have one, of to ride in one owned by a son, daughter, brother or sister.

They have found in Africa, well preserved, bones of a dinosaur, twice as big as the biggest thus far known. The history of that dinour would show that the bigger he greet, the nearer he was to extinc-That thought should occupy the minds of our financial dino-"Providence arranges it so that the trees shall not grow into the heavens." That's also true of dinosaurs and corporations.

Mussolini complains, justly, that our immigration laws are a hardship for Italy. They are an infimtely greater hardship for the United States. The skillful workers that Italy would send to us, and that we stupidly refuse to admit, represent the very wealth that this

Florida alone could usefully take care of all Italian immigration for the next ten years, and be enriched thereby to an extent inconceivable.

Why not permit the different States to establish their own quotas, regulate their own immi-gration, and agree to keep immigrants thus admitted within their own borders for a certain number of years after their arrival?

A German scientist demonstrates his ability to get flakes of real gold from mercury. An American is working at the problem. Don't worry yet, however. The manufactured gold costs much more than the other kind. And mercury, having so great an affinity for gold. ing so great an affinity for gold, may have small particles of gold always stored away within it.

The Massachusetts Historical Society has a genuine lock of Napoleon's hair. Thousands will gaze on it in awe that would never take the trouble to study the brain that once worked under that hair.

Read his letters to those that represented him in the government of his various conquered territories and you will know something about Napoleon's power. Read of his attitude toward women, a little above that of a chimpanzee, and you'll know about his weakness.

A young man, eighteen years old, set fire to seven barns on Henry Ford's estate last April. He was convicted, and ordinarily would have been sent to spend his early manhood in some prison uni-

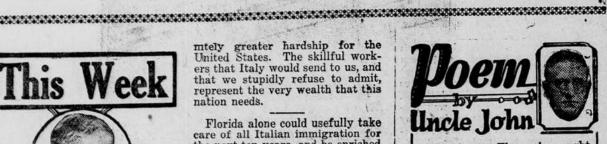

versity of crime.

Henry Ford appealed to the Court, and had the young man put on probation, guaranteeing that he, Ford, would send the young man that burned his barns to the Ford

More trade schools and more Fords might make jails less num-

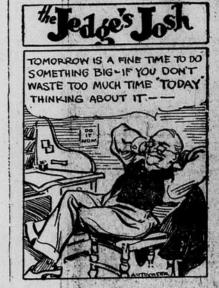

A scientist in the British Museum, reading ancient papyri, finds one of the third century, containing thirty verses of the twenty-sixth chapter of Matthew. Thus we know that three centuries after the birth of Christ men were warned that "they that take the sword shall perish by the sword." Men nevertheless went on taking the sword and perishing by the sword through all the centuries up to now. This discovery will be useful because it will cause many to read over again St. Matthew's descrip-tion of the Last Supper.

/ !! in One Month, Too!

My Aunty Flapper's caught the craze to pattern after youthful ways; she loves the youthful ways; she loves the girlish paces. . . Her painted iowls defies the stage—besides her other camouflage, in various other places. She never does a thing by halves, an' so displays her fatted calves with native erudition. . . She spends a lot fer fancy hose—till every skinny neighbor knows she banters indiscretion! I couldn't say her wealth of bust was somethin' to excite disgust in any whiskered artist. In fact I wouldn't sign my name to any any whiskered artist. In last wouldn't sign my name to any dope that carries blame to one who looks her smartest. "This world is all a fleetin' show" our transient natur' makes it se, -we're all averse to sorrow, —we're all averse to sorrow, and, while we can't guess Aunty's age, because of that-air camouflage—she may be gone tomorrow! And while she travels with a zip, I reckon we should let her rip, with girly-girly unction. . . My heirs can't throw much dust at me, if I prove good an' pure as she, when I have ceased to function.

better have, if you don't want me to shoot a hole in the tank."
"Y-yes, sir. We got a pet cook."
"Stick that one under it and is:

Presently the driver concorne t that the can was full, and de Wreek verified the matement.

"All right. Dump it out in the

BEGIN MERE TODAT

Safty Morgan has to go 55 miles stiffly aloft. Then three figures in the father's ranch to cutch a single fle from the tonneau, the last one wearing skirts. The person with the heavy voice coughed nervously "We'll give you five "shut up!" commanded the Wreck. "You'll give me anything I want. You'll give me anything I want. That's business. Stay there. Now, any out of gasoline. As first, they see the twin three step out in front of those lights where I can keep a good eye on you. That's business. Stay there. Now, driver, got a can?"

"Ah' ah "ah "poroaching car. The "Ah" ah "yes, sir."

"Get it—and be careful you don't into the tank under the seat."

"Now we go back again," said the The man in uniform moved cau Wreck. "And when I tell you to do aded I'm going to attend to tious; to the side of the car and the bas to be done. Nobody's trastrapped a five-gallon container from the running board. something, I don't want any quistions asked."

"N-no, sir." Once more at the side of the aig "Full, eh? Carrying extra gas and total lowerd the staring head. wouldn't give me a drop, eh? All car, the Wreck ordered his servent right, you pick up that can and to lay aside the five-gallon can. "Got a tire pump on that engine?"

he inquired. For a few seconds it puzzled the was, a big black machine, long Wreck what to do with the trio who "Rotten luxury. But it's going to save your back a lot of work. Get busy now and let the air out of glare of lights. He solved it by order-

those tires. All of it!" The driver hositated, from bewilderment rather than insubordination. But he jumped to the task when the Wreck prodded him with the muzzle of Sally's six-shooter. The tires flattened themselves under the wheels. each with a long, saril sigh. "Open up those valves on the

The spares of sang a swan song.
"There. T's t'll keep you busy for a while. Come along."

They joined the group of sitters in the middle of the road. Standing with his back to the headlights and carefully shielding his own face from illumination, the Wreck contemplat-

ed his victims for a moment.
"You" he said, suddenly, with a signincant gesture of the gui. "The me one who didn't want to sell any god van. op!"
The or not of the

Chred the Wreck, slowly, "are not has how, If I had as nuch gas as you've are not your tank I could run from he're to New York. You're what I ca' a damned hege All I'm arking is "we rallons and I'd pay for pot 1 get a?"

You do not:

The man with the are-gallon can going to give you a change to the man going to give you a change to the man going to give you a change to the man with the are-gallon can going to give you a change to

"Now, you just lay hold of that run's and get to work, hog." The gentleman with loud signs of

wealth seized the crank and yanked violently. "Spin it." ordered the Wreek

He spun it, but there was an answer from the engine. "Spin it some more." Not even a sputter.

"Spin it again-harder." Still there was no response. The large man panted heavily and wired

his forehead. "You going to keep me here. night?" demanded the Wrock.

you don't spin that crank-" There was another furious small of whirling. Sally pinched has com-

"How can he start it when haven't turned on the wnitten"

"He can't," said the Wrech. "D gone it, what did you butt in for . I wanted to see him spin it."
